PURSUING A REVIVAL IN GOLD

Precious Metals Summit Beaver Creek
10th – 13th September 2019
CAUTIONARY NOTES

Cautionary Note
This document has been prepared by Revival Gold Inc. (“Revival Gold” or, the “Company”) for evaluation of the Company by the recipient. The information contained in this presentation is derived from estimates made by the Company, information that has been provided to the Company by other parties, and otherwise publicly available information concerning the Company and does not purport to be all-inclusive or to contain all the information that an investor may desire to have in evaluating whether or not to make an investment in the Company. It is not intended to be relied upon as advice to investors or potential investors and does not take into account the investment objectives, financial situation or needs of any particular investor. No person has been authorized to give any information or make any representations other than those contained in this presentation and, if given and/or made, such information or representations must not be relied upon as having been so authorized. The information and opinions contained in this presentation are provided as at the date of this presentation. This presentation may not be reproduced, further distributed or published in whole or in part by any other person.

The technical and scientific information in this document was reviewed and approved by Steven T. Priesmeyer, C.P.G., VP, Exploration and a Qualified Person under National Instrument 43-101. Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this presentation.

Forward Looking Statement
This presentation includes certain “forward-looking statements” which are not comprised of historical facts. Forward-looking statements include estimates and statements that describe the Company’s future plans, objectives or goals, including words to the effect that the Company or management expects a stated condition or result to occur. Forward-looking statements may be identified by such terms as “believes”, “anticipates”, “expects”, “estimates”, “may”, “could”, “would”, “will”, or “plan”. Since forward-looking statements are based on assumptions and address future events and conditions, by their very nature they involve inherent risks and uncertainties. Although these statements are based on information currently available to the Company, the Company provides no assurance that actual results will meet management’s expectations. Risks, uncertainties and other factors involved with forward-looking information could cause actual events, results, performance, prospects and opportunities to differ materially from those expressed or implied by such forward-looking information. Forward looking information in this presentation includes, but is not limited to, the Company’s objectives, goals or future plans, statements, completion of a financing, exploration results, potential mineralization, the estimation of mineral resources, exploration and mine development plans, timing of the commencement of operations and estimates of market conditions. Factors that could cause actual results to differ materially from such forward-looking information include, but are not limited to the failure to identify mineral resources, failure to convert estimated mineral resources to reserves, the inability to complete a feasibility study which recommends a production decision, the preliminary nature of metallurgical test results, delays in obtaining or failures to obtain required governmental, environmental or other project approvals, political risks, uncertainties relating to the availability and costs of financing needed in the future, changes in equity markets, inflation, changes in exchange rates, fluctuations in commodity prices, delays in the development of projects, capital, operating and reclamation costs varying significantly from estimates and the other risks involved in the mineral exploration and development industry, and those risks set out in the Company’s public documents filed on SEDAR. Although the Company believes that the assumptions and factors used in preparing the forward-looking information in this presentation are reasonable, undue reliance should not be placed on such information, which only applies as of the date of this presentation, and no assurance can be given that such events will occur in the disclosed time frames or at all. The Company disclaims any intention or obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, other than as required by law.

Cautionary Note to United States Investors Concerning Estimates of Measured, Indicated and Inferred Resources
This presentation uses the terms "Measured", "Indicated" and "Inferred" Resources. United States investors are advised that while such terms are recognized and required by Canadian regulations, the United States Securities and Exchange Commission does not recognize them. "Inferred Mineral Resources" have a great amount of uncertainty as to their existence, and as to their economic and legal feasibility. It cannot be assumed that all or any part of an Inferred Mineral Resource will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred Mineral Resources may not form the basis of feasibility or other economic studies. United States investors are cautioned not to assume that all or any part of Measured or Indicated Mineral Resources will ever be converted into Mineral Reserves. United States investors are also cautioned not to assume that all or any part of an Inferred Mineral Resource exists, or is economically or legally mineable.

Disclaimer to United States Investors
The securities of the Company have not been registered under the United States Securities Act of 1933, as amended (the "U.S. Securities Act"), or any state securities laws and may not be offered or sold within the United States or to U.S. Persons unless registered under the U.S. Securities Act and applicable state securities laws or an exemption from such registration is available.
THE GROWING GAP

Global production vs. discoveries

Growing gap between global production and discoveries

Source: SNL, GFMS, Paradigm Capital Inc.
A growth company in gold

• Veteran team focused on advanced/ brownfields gold projects in US and Canada

• Launched in 2017 with former producing Beartrack-Arnett gold project in Idaho

• Continuation of aggressive exploration in 2019 with a $4.2 MM program underway
CAPITAL STRUCTURE

Tight structure, significant institutional ownership

52.5M Basic Shares

15.6M Options & Warrants (avg. exercise px $0.83 each)

68.1M Fully Diluted Shares

C$3.7M Est. Working Capital (30 June ‘19)

C$0.71 Share Price (5 Sept. ‘19)

C$37M Basic Market Cap

35% Institutional (Orion, Konwave, US Global, Delbrook, etc.)

6% Yamana

13% Management

14% Retail

32% High Net Worth
KEY LEADERSHIP

**Hugh Agro** | President & CEO  
B.Sc. (Mining Engineering), MBA, P.Eng.  
Mining engineer and executive. Former EVP, Kinross Gold.

**Wayne Hubert** | Director  
B.Sc. (Chemical Engineering), MBA  
CEO of InZinc Mining, former CEO of Andean Resources.

**Adam Rochacewich** | VP and CFO  
B.Comm., CPA, CA  
Accounting and finance professional. Work experience with both majors and juniors.

**Pete Blakeley** | General Manager  
B.Sc. (Geological Engineering)  
Geological engineer, former Site Manager, Meridian Beartrack and Chief Engineer, Andean Resources.

**Diane R. Garrett** | Non-Exec Chairman  
M.Sc. (Minerals Economics), Ph.D. (Engineering)  
CEO of Nickel Creek Platinum Corp., former CEO of Romarco Minerals.

**Don Birak** | Director  
B.Sc., M.Sc. (Geology)  
Former SVP, Coeur Mining and VPX AngloGold NA. Fellow of AusIMM, SME Regis. Mem., QP for NI 43-101 TRs

**Steve Priesmeyer** | VP Exploration  
B.Sc., M.Sc. (Geology). C.P.G.  
Geologist with experience in projects from grassroots through feasibility. QP for NI 43-101 TRs

**Rodney Cooper** | Technical Advisor  
B.Sc. (Hon, Mining), P.Eng., M.B.A., Acc. Dir.  
Senior mining executive with operational, technical, construction and financial experience in over 30 jurisdictions worldwide.
POSITIONED IN NORTH AMERICA

2\textsuperscript{nd} largest gold-producing region in the world\textsuperscript{1}

Fraser Institute ranks Idaho ahead of Finland, BC, Ontario and Mexico\textsuperscript{2}

Source:\textsuperscript{1}World Gold Council; \textsuperscript{2}Fraser Institute 2018 Survey of Investment Attractiveness for exploration & mining.
BEARTRACK GOLD PROJECT

Former producer. Open pit, heap leach mining in ‘90’s. Recovered 600,000 oz gold.

- **2018 maiden resource**¹ (mill and leach material):
  - 1.2 million oz @ 1.13 g/t Au indicated
  - 0.8 million oz @ 1.41 g/t Au inferred

- **Strike extended 950 meters south** in 2018; **open SW & at depth**

- **2019 follow-up drilling:**
  - **3 core holes at Joss**²

---
¹ See Endnote 1; ² See Revival Gold July 29, 2019 press release.
ARNETT GOLD PROJECT

2,380 hectare claim block adjoining Beartrack

- Pincock Allen & Holt and Kappes Cassidy studies in mid-90’s reported open pit heap leach potential

- Near-surface gold in oxides at Haidee confirmed in 2018:
  - 400-meter strike and open

- 2019 step-out drilling program:
  - 7 of 22 core holes released to-date

1 See Endnote 2; 2 See Revival Gold September 3, 2019 press release.
LAND POSITION – 5,100 HECTARES

> 3.5 MM ounces discovered or produced to date*

Source: Revival Gold; see Endnotes 1 and 2; * see Endnote 3.
BEARTRACK EXPANSION OPPORTUNITIES

+5 km mineralized trend – multiple targets

JOSS (focus of 2019 drilling)
Open along strike

SOUTH PIT
Open at depth

WARD’S GULCH
Open at depth

NORTH PIT

RESOURCE EXPANSION TARGETS

Beartrack 3D Block Model – N-W View
New 2018 & 2019 Core Drill Holes Shown

Legend
- 2017 Blocks >=0.6 g/t Au
- US$1300 Au Resource Pit Shell
- 2018 Drill Intercepts >=1.5 g/t Au

Source: Revival Gold
2019 OPERATIONAL ACTIVITIES

BEARTRACK - $1.2 MM

• 1,200 meters **core drilling at Joss** – *results released July 29th*

• 2\textsuperscript{nd} phase sulphide **metallurgical test work** – *Q3-Q4*

• Regional **prospecting** and compilation – *Q3-Q4*

• Additional drill **permits** (Rabbit, Moose, Joss) – *in progress*

---

ARNETT - $3.0 MM

• **Permit** for 53 drill pad locations across Arnett – *approved in June*

• Airborne **geophysics** and soil sampling – *underway*

• ~4,000 meters of **core drilling at Haidee** – *complete, first results released Sept. 3\textsuperscript{rd}*

• Bottle-roll **metallurgical test work** – *Q3-Q4*
BEARTRACK 2019 DRILL PROGRAM – 1,200 METERS

BT19-224 hit 2.35 g/t Au over 70 m - **incl. 4.55 g/t Au over 21 m**

Source: Revival Gold; drilled widths shown; see July 29th, 2019 press release for details.
BEARTRACK UNDERGROUND POTENTIAL

Open beyond 600 m depth; mineralized over +5 km strike

- Current focus on near-surface resources
- Higher grades encountered at depth:
  - 8.5 g/t Au over 2.7 m in the South Pit area (pictured left)
  - 6.6 g/t Au over 8.2 m and 4.6 g/t Au over 21 m in the Joss area
  - 71 g/t Au over 9.8 m in the Ward’s Gulch area
- Developing structural model to improve targeting

Source: Revival Gold; drilled widths shown; see Revival Gold press releases for further details.
AEROMAGNETIC GEOPHYSICS SURVEY

Target rich land position

2 km diameter, shallow (approx. 300-meter-deep) magnetic high located below gold mineralization in the Haidee area.

Source: Revival Gold; see Revival Gold August 12th, 2019 press release for summary aeromagnetic results.
ARNETT EXPLORATION OPPORTUNITIES

Multiple target areas along two 3-4 km trends

ARNETT 2019 DRILL PROGRAM – 4,100 METERS

7 holes released to-date; system expanded and remains open

Source: Revival Gold; drilled widths shown; see Revival Gold press releases including September 3rd, 2019 for further details.
BEARTRACK SITE

Offers head start on potential new leach operation

- **17 km** N-W of Salmon, Idaho (population 3,100)
- **Power**, water, roads
- Leach ponds, ADR plant structure, cyanidation permit
- **11,000 sq. ft** core facility
### WHAT IS NEXT?

Building the next *great* growth company in gold

REVIVAL GOLD INC.

FAST TRACKING …
• Veteran gold team
• Permitted to drill
• Funded 2019 exploration program and resource update

PROVEN PROPERTY…
• Brownfield site
• Past producer at much lower gold prices
• >60% of resources in indicated category

MAIDEN RESOURCE
7 Months Out of the Gate

TARGETING
>3 MM oz Au

... EXCITING YEAR AHEAD
• Aggressive exploration
• Growing interest in N. American gold assets
• Attractive valuation relative to peers

VALUATION*
11 $US/oz MI&I Au

PROPERTY AGREEMENTS

**Beartrack:** Key terms with subsidiary of Yamana Gold announced September 7, 2017 (as amended May 8, 2019)

- 1 MM shares and US$250,000 paid on close; further 3mm shares due over four years (of which 2 MM shares have been paid to date)
- US$8 MM in exploration over four years; including US$4.0 MM by September 29, 2019 (of which US$5.0 MM had been expended by June 30th, 2019)
- Funding site/reclamation costs in year four of the Agreement (approx. US$850,000)
- Payment of the greater of US$6/oz of resource or US$15/oz in reserve in year seven (2024) with 1.25% NSR, 0.25% capped at US$1 MM
- Assume bonding and remaining site reclamation obligations on close of acquisition

**Arnett:** Terms announced June 30, 2017. Additional properties acquired and announced on July 24, 2018

- As at September 2019, remaining property acquisition payments for a 100% interest in all Arnett properties total US$1.0 MM (being US$250,000 in each of June 2020 and June 2021 and US$500,000 in June 2022)
- Various NSRs apply ranging from 1% to 2% with buy-back rights for all totalling US$4MM
1. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. It is reasonably expected that most of Inferred Mineral Resources could be upgraded to Indicated Mineral Resources with continued exploration.

2. Mineral Resources were tabulated for model blocks with positive net value that lie within an optimized conceptual pit. Economic parameters - US$1,300 Au, Heap Leach Recovery: 85% of cyanide soluble gold, Mill Recovery: 84% of contained gold by fire assay, Mining Cost: US$2.66/tonne, Heap Leach Processing Cost: US$5.00/tonne, Mill & POX Processing Cost US$17.00/tonne, G&A Cost: US$1.75/tonne, Pit Slope Angle: 45 degrees. The price, recovery and cost data translate to a breakeven gold cut-off grade of approximately 0.61 g/t gold and 0.26 g/t cyanide soluble gold for mill and heap leach respectively.

3. Rounding may result in apparent discrepancies between tonnes, grade, and contained metal content. The estimate of mineral resources may be materially affected by geology, environment, permitting, legal, title, taxation, socio-political, marketing other relevant issues.

4. The effective date of the mineral resource estimate is April 18, 2018.

5. Heap Leach material defined by cyanide soluble grade leach characteristics.

BEARTRACK 2018 RESOURCE (cont’d)

- Mineral Resource estimated from 458 drill holes totalling approximately 71,000 meters of core and RC holes
  - 1990-97: 424 core and RC holes totaling approximately 57,450 meters
  - 2012-17: 34 core holes totalling approximately 13,740 meters
- US$1,300/ounce gold price resulted in a 0.61 g/t gold mill cut-off and a 0.26 g/t cyanide soluble gold heap leach cut-off
- Recovery:
  - Heap Leach: 85% of cyanide soluble gold (or 68% of contained gold)
  - Mill & POX: 84% of contained gold
- Mineral Resources estimated using inverse distance cubed (ID^3) grade model; compares favorably with ordinary kriging
- Blocks measure 7.62 meters (25 feet) in each direction
- Drill hole spacing:
  - Indicated Resource: approximately 30 meters (100 feet)
  - Inferred Resource: approximately 60 meters (200 feet)

6.1 m @ 1.9 g/t Au from 54.9 m to 60.0 m

1. 0.38 g/t Au
2. 5.32 g/t Au
3. 0.75 g/t Au
4. 1.15 g/t Au
END NOTES

1. Beartrack Resource (page 8, 10)
   33.3 million tonnes at 1.13 g/t Au for 1,214,000 ounces Au in indicated resource and 16.9 million tonnes for 1.41 g/t Au for 765,000 ounces Au in inferred resource. See Revival Gold Beartrack 43-101 Technical Report dated July 12, 2018 for further details.

2. Arnett Historic Resource (page 9, 10)
The historical resource at Arnett was reported by Pincock, Allan & Holt in an updated conceptual study issued in 1994 (the “PAH 1994 Update”). Historical indicated geologic resources in the PAH 1994 Update were reported as 10.9 million tonnes at 0.93 grams of gold per tonne (12 million tons at 0.027 ounces of gold per ton) containing approximately 327,000 ounces of gold. Historical inferred geologic resources in the PAH 1994 Update were reported as 2.6 million tonnes at 0.62 grams of gold per tonne (2.9 million tons at 0.018 ounces of gold per ton) containing approximately 53,000 ounces of gold. The PAH 1994 Update was prepared prior to the implementation of NI 43-101 and does not conform to this standard. A qualified person has not done sufficient work to classify the historical estimate as current mineral resources or mineral reserves and Revival Gold is not treating the historical estimate as current mineral resource or mineral reserve. The Project will require considerable further evaluation in order to verify the PAH 1994 Update. See Revival Gold press release dated July 24, 2018 for further details.

3. Combined Production and Gold Inventory From Area (page 10)
Documented production and historic resources of gold totals: 475,000 - 600,000 oz of placer gold production (Johnson et al, 1998), 600,000 oz of hard rock gold production at Beartrack (Meridian Gold), 327,000 oz of gold in historic indicated resources and 53,000 oz of gold in historic inferred resources at Arnett (see Endnote 2) and 1,214,000 oz gold in indicated resource and 765,000 oz gold in inferred resources at Beartrack (see Endnote 1).
