

## **REVIVAL GOLD TERMINATES ROYALTY INTEREST**

**Toronto, ON – August 18<sup>th</sup>, 2023 – Revival Gold Inc. (TSXV: RVG, OTCQX: RVLGF)** (“Revival Gold” or the “Company”), is pleased to announce that it has reached an agreement to terminate a 1% Net Smelter Royalty (“NSR”) on sixteen claims (the “HAI and Gold Bug Claims”) that comprised approximately 133 hectares within Revival Gold’s Beartrack-Arnett 5,800 hectare project area.

The HAI and Gold Bug Claims were acquired by Revival Gold in 2017 subject to a 1% NSR with an option for the Company to buyback the 1% NSR for a price of US\$2 million. The claims are undrilled by Revival Gold and currently host no Mineral Resources.

Revival Gold has agreed to deliver the following in exchange for extinguishing the 1% NSR on the HAI and Gold Bug Claims:

- C\$75,000 cash payment on closing (“Closing”); and
- 200,000 common shares of Revival Gold (the “Shares”) issued on Closing with such Shares subject to a hold period from the Closing date as follows: (i) 66,666 Shares shall be tradeable after four months; (ii) 66,667 Shares shall be tradeable after twelve months; and the remaining 66,667 Shares shall be tradeable after eighteen months.

“The opportunity to terminate an NSR on undrilled claims enhances Revival Gold’s exposure and flexibility in advance of planned future exploration later this year”, said President and CEO Hugh Agro.

The termination of the 1% NSR is subject to customary closing conditions and receipt of all necessary regulatory approvals, including TSX Venture Exchange approval. Closing is expected by the end of August 2023 or such later date as the parties may agree.

### **About Revival Gold**

Revival Gold is a growth-focused gold exploration and development company. The Company is advancing the Beartrack-Arnett Gold Project located in Idaho, USA.

Beartrack-Arnett is the largest past-producing gold mine in Idaho. The project benefits from extensive existing infrastructure and is the subject of a recent Preliminary Feasibility Study for the potential restart of open pit heap leach gold production operations.

Since reassembling the Beartrack-Arnett land position in 2017, Revival Gold has made one of the largest new discoveries of gold in the United States in the past decade. The mineralized trend at Beartrack extends for over five kilometers and is open on strike and at depth. Mineralization at Arnett is open in all directions.

Additional disclosure including the Company's financial statements, technical reports, news releases and other information can be obtained at [www.revival-gold.com](http://www.revival-gold.com) or on SEDAR+ at [www.sedarplus.com](http://www.sedarplus.com).

### **Cautionary Statement**

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this news release.

This news release includes certain "forward-looking information" within the meaning of Canadian securities legislation and "forward-looking statements" within the meaning of U.S. securities legislation (collectively "forward-looking statements"). Forward-looking statements are not comprised of historical facts. Forward-looking statements include estimates and statements that describe the Company's future plans, objectives or goals, including words to the effect that the Company or management expects a stated condition or result to occur. Forward-looking statements may be identified by such terms as "believes", "anticipates", "expects", "estimates", "may", "could", "would", "will", or "plan". Since forward-looking statements are based on assumptions and address future events and conditions, by their very nature they involve inherent risks and uncertainties. Although these statements are based on information currently available to the Company, the Company provides no assurance that actual results will meet management's expectations. Risks, uncertainties, and other factors involved with forward-looking statements could cause actual events, results, performance, prospects, and opportunities to differ materially from those expressed or implied by such forward-looking statements. Forward-looking statements in this news release include, but are not limited to, the timing of Closing, the receipt of all regulatory approvals, including the approval of the TSXV, the terms of the termination of the 1%NSR, the Company's objectives, goals and future plans, and statements of intent, the implications of exploration results, mineral resource/reserve estimates and the economic analysis thereof, exploration and mine development plans, timing of the commencement of operations, estimates of market conditions, and statements regarding the results of the pre-feasibility study, including the anticipated capital and operating costs, sustaining costs, net present value, internal rate of return, payback period, process capacity, average annual metal production, average process recoveries, concession renewal, permitting of the project, anticipated mining and processing methods, proposed pre-feasibility study production schedule and metal production profile, anticipated construction period, anticipated mine life, expected recoveries and grades, anticipated production rates, infrastructure, social and environmental impact studies, availability of labour, tax rates and commodity prices that would support development of the Project. Factors that could cause actual results to differ materially from such forward-looking statements include, but are not limited to failure to identify mineral resources, failure to convert estimated mineral resources to reserves, the inability to maintain the modelling and assumptions upon which the interpretation of results are based after further testing, the inability to complete a feasibility study which recommends a production decision, the preliminary nature of metallurgical test results, delays in obtaining or failures to obtain required governmental, environmental or other project approvals, changes in regulatory requirements, political and social risks, uncertainties relating to the availability and costs of financing needed in the future, uncertainties or challenges related to mineral title in the Company's projects, changes in equity markets, inflation, changes in exchange rates, fluctuations in commodity and in particular gold prices, delays in the development of projects, capital, operating and reclamation costs varying significantly from estimates, the continued availability of capital, accidents and labour disputes, and the other risks involved in the mineral exploration and development industry, an inability to raise additional funding, the manner the Company uses its cash or the proceeds of an offering of the Company's securities, an inability to predict and counteract the effects of COVID-19 on the business of the Company, including but not limited to the effects of COVID-19 on the price of commodities, capital market conditions, restriction on labour and international travel and supply chains, future climatic conditions, the discovery of new, large, low-cost mineral deposits, the general level of global economic activity, disasters or environmental or climatic events which affect the infrastructure on which the project is dependent, and those risks set out in the Company's public documents filed on SEDAR+. Although the Company believes that the assumptions and factors used in preparing the forward-looking statements in this news release are reasonable, undue reliance should not be placed on such information, which only applies as of the date of this news release, and no assurance can be given that such events will occur in the disclosed time frames or at all. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, other than as required by law.
